

## Regional Territorial Planning and Sustainable Development Plan North-West Region, Cameroon

### Project Description

With the National and Regional Territorial Planning, the Government of Cameroon aims at reaching one of the milestones of the VISION 2035 by providing the territorial planning instruments required for its development strategy. The consulting consortium led by INFRASTRUKTUR & UMWELT is supporting the elaboration of the Regional Territorial Planning and Sustainable Development Plan of the North-West Region.

The project's objective is to provide the North-West Region with a Plan that reflects a consensual vision for its development. It shall address the deficit of information on the regional territory, steer the spatial planning of equipment, create a framework for informed decision-making and translate for the Region the guidelines of the National Territorial Planning and Sustainable Development Plan.

### Envisaged Results

- A diagnostic study of the territory that presents the state of affairs of the North-West and highlights its strength, weaknesses, opportunities and threats. It results in the formulation of key stakes of development.
- A prospective analysis that describes the future of the territory and possible development scenarios based on the outcome of the diagnostic and on founded hypothesis on the behavior of stakeholders.
- Basic principles and long-term guidelines for the development of the Region and their translation in quinquennial action plans.
- Cartographic documents describing the diagnostic study, the prospective analysis and the development objectives.

### Our service

- Joint development of all the components of the Regional Territorial Planning and Sustainable Development Plan.
- Support the implementation of the action plan by developing a monitoring framework.
- Capacity building through participatory approach.
